

CRIMSON DAWN - WATERSLIDE DECAL SHEET

Water-transfer paper | Gothic storm-cloud chapter badge

Which paper to use

White outline needs white ink or white paper. Most home printers cannot print white.

- WHITE waterslide paper -> use PAGE 2 (full colour: crimson + white edge). Best match to the locked badge on charcoal armour.
- CLEAR waterslide paper -> use PAGE 3 (crimson-only silhouettes). White edge will not appear; freehand a thin white outline after the decal sets, or leave crimson-only.

Print settings

1. Print at Actual size / 100% - turn OFF fit-to-page / shrink-to-fit.
2. Use the glossy / printable side of the waterslide paper (check your pack).
3. Inkjet: allow full dry time, then spray 2-3 light coats of clear acrylic (or the sealer your paper brand recommends) before cutting/soaking.
4. Laser: many waterslide papers work without spray seal; follow the pack.
5. Let sealer cure fully before cutting.

Apply

1. Gloss-varnish the armour spot first (decals bite better on gloss).
2. Cut close to the cloud - leave a tiny clear margin, not a huge square.
3. Soak in lukewarm water 20-60 seconds until the decal loosens.
4. Slide onto the RIGHT shoulder pad; nudge with a wet brush.
5. Blot from the center out with a soft tissue; chase bubbles.
6. Optional: Micro Set under / Micro Sol over for curved pads.
7. When bone-dry, seal with gloss then matt varnish.

Size guide (width across the cloud)

- 4-5 mm knee / tiny detail
- 7-9 mm Primaris / tactical pauldron
- 11-14 mm Terminator / Gravis pauldron
- 18-28 mm vehicle / banner / practice

Hairline boxes are cut guides only - cut inside them, close to the art.

Assets also in docs/warhammer/stencils: cloud-decal-color.png, cloud-decal-crimson-only.png. Regenerate: python3 docs/warhammer/generate_waterslide_decals.py

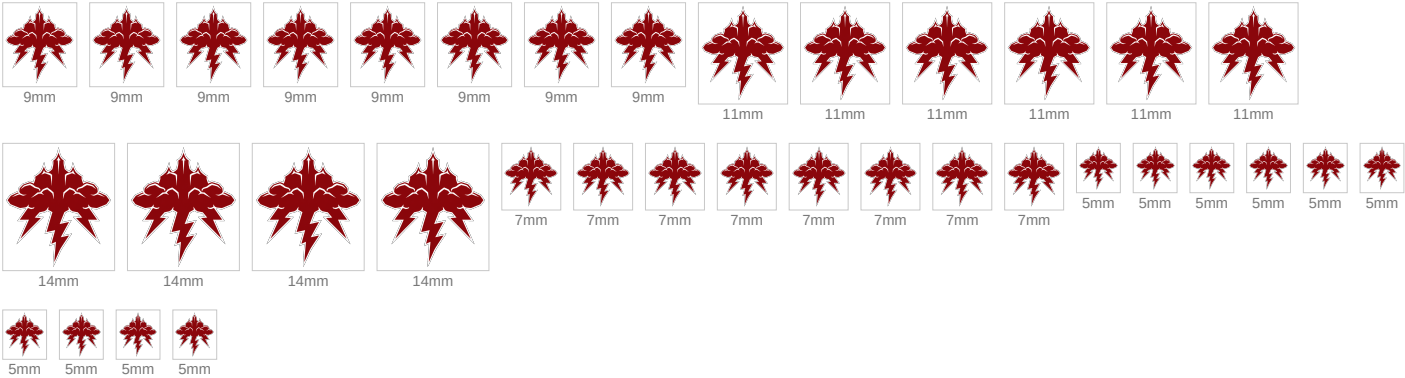

Colour target:

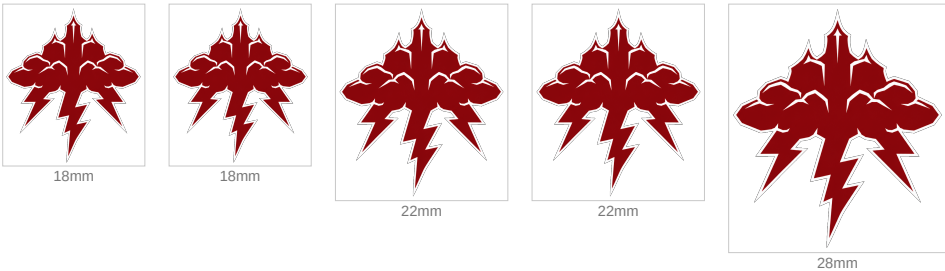

Deep crimson + white edge on charcoal plate.

Keeps the white outline. Do not use clear paper for this page unless you have white ink.

Infantry / Terminator strip

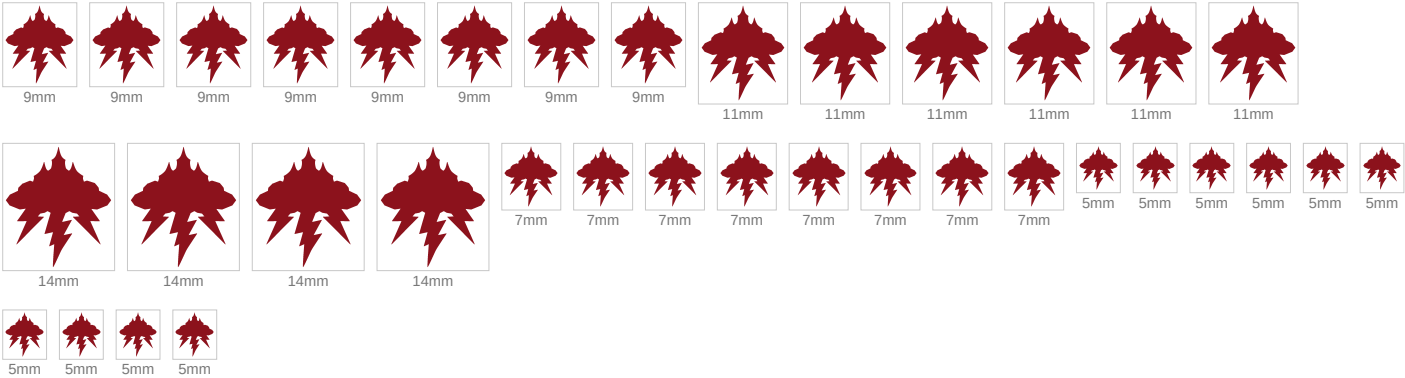

Larger / vehicle / spares

No white ink required. Optional: freehand thin white edge after sealing.
